

## Johnny Whoop

Materials – None (Need to Watch “Johnny Whoop” Video Beforehand)

Watch the video beforehand. The video shows the correct way to play the game. The trick that everyone will need to catch on to is that you clasp your hands together after you are done.

So what you do is show them how to play, let them try it, and tell them they have to try until they figure it out. Once they have figured it out they win and can stop (we often do this before a meal or snack and this is their ticket to go).

The trick to making the game fun is being discrete about the ending and asking people once they have figured it out to keep it a secret. They can watch others and tell them if they are doing it right, but should not give them the hint.

Show the whole group at once, and then go around as people ask you to do it again.

Great game! Be careful not to embarrass the last ones to figure it out too much. If you are worried about this, do not let the game carry on too long and make it more obvious in the beginning.
